

## OVERVIEW

Cloud Advisors is pleased to present Virtual WorkSpace. Virtual WorkSpace provides a Windows 10 desktop experience for users that is extremely secure and allows access from anywhere there is an internet connection. Virtual WorkSpace runs the same applications that a Windows 10 desktop can run, however in a much more secure environment. A Virtual WorkSpace cannot be stolen like a laptop because it is physically located in an AWS data center.

## FEATURES

- Virtual WorkSpace utilizes SSD drives for performance and reliability
- Virtual WorkSpace is encrypted with 256-bit Advanced Encryption Standard (AES-256)
- Virtual WorkSpace is backed up every 12 hours
- Virtual WorkSpaces are OS patched weekly
- Printing is a breeze with Virtual WorkSpace. Printing is passed through and prints to any printer connected to the local device. This includes networked printers too.
- Virtual WorkSpace is accessed by installing a secure, lightweight client on supported devices. This includes a built-in VPN client that encrypts the connection between the local device and the Virtual WorkSpace.
- Virtual WorkSpace supported devices:
  - Windows 7, 8, and 10 devices
  - Mac
  - Android tablets and phones
  - iPhone tablets and phones
